

RE301

NETWORKS AND SECURITY

NEW COURSE

IT security, everywhere and for everyone

 New course**DURATION**
1 DAY**REGULAR FEE**
510 \$**PREFERENTIAL FEE**
460 \$

Objectives

After completing this course, participants will be able to evaluate the potential for risk in order to protect themselves from threats inherent to computer use.

Targeted audience

Computer users in a personal and professional context.

Prerequisite

None.

Content

- Unit 1 - Threats: distinguishing the main cyber threats
- Unit 2 – Phishing and social engineering: spotting phishing emails
- Unit 3 – Social networks: evaluating risks associated with the use of social networks
- Unit 4 – Digital identity: evaluating the risks associated with managing your digital identity

General Note

As digital device users, both at work and at home, people know that IT security is an increasingly critical issue. Using case studies and discussions, this course aims to make you aware of the different traps and effectively protect you.
