

VM105

VMWARE

Optimizing VMware vSphere 6.7

 Laboratory course**DURATION**
3 DAYS**REGULAR FEE**
1 435 \$**PREFERENTIAL FEE**
1 290 \$

Objectives

To provide the knowledge and skills required to optimize and make effective use of the advanced features of VMware vSphere 6.x.

Targeted audience

All networking positions (other than DBAs).

Prerequisite

Experience with [TCP/IP networking](#), [Windows Client/Server administration](#) and [VMware vSphere](#) (Course VM110).

Content

- Overview of the advanced management tools provided by vSphere
- Management and configuration using the command line tools
- Monitoring resources and performance
- Repairing a vSphere infrastructure
- Configuring, managing and analyzing vSphere log files
- Automating tasks with scripts
- Managing CPU and vCPU resources
- Managing RAM memory resources
- Setting up and managing networks using vNetwork Distributed Switch (dvSwitch, vDS)
- Managing storage resources
- Advanced vSphere configuration options
- Best practices in managing virtual machines

General Note

Most of the features discussed are available in all versions of VMware vSphere (6, 6.0 and 5.5)

Material Note

The course material is in English.
